

## PRESS RELEASE

Paris, 19 September 2022

**NEPTING ANNOUNCES THE INTEGRATION OF HEOH DONATION AND SOON TIP SOLUTIONS ON PAYMENT TERMINAL THAT CAN BE ACTIVATED IN A FEW CLICKS**

Nepting, a recognized player in the field of electronic banking, and the fintech HeoH, the first omnichannel platform allowing the collection of 360° donations, sign a partnership to create links between the world of business and non-profit organizations.

Thanks to this strategic partnership, Nepting offers its merchant and professional customers a solution for collecting donations and soon tipping on payment terminals. These applications developed by Nepting can be activated on payment terminals in a few clicks and are compatible on all terminals equipped with Nepting.

**For donation:**

Merchants will be able to support national or local associative actors, by allowing their customers at the time of their purchase, to make a donation at the rounding or in fixed amount, on the payment terminal. This makes it possible to enrich the customer's shopping experience and to carry out differentiating marketing for the merchant.

**For the tip:**

The 2022 Finance Law allowing the tax exemption of tips, Heoh has been deploying a free tipping solution for merchants for a few months. The first results show a very good reception from customers. The multiplication of tips by 4 or even by 5, thanks to this simple and fast solution, allows the professions concerned to make their jobs more attractive and to retain their employees to face the current recruitment crisis.

HeoH has been working with Nepting for several years to equip its donation terminals, donation search terminals and Open Payment solutions.

All of these solutions will be presented on the Nepting stand at Paris Retail Week from 20 to 22 September 2022 at Paris Expo Porte de Versailles (Stand B057).

**About Nepting:**

Nepting, a Montpellier company, is a publisher of an omnichannel payment platform and provider of associated payment services.

Nepting offers around its cloud Centralized Acceptance System, unique and next generation, a complete offer composed of different solutions to meet all the shopping experiences of any type of business;

These solutions, mPOS, SoftPos, light TPE, WebInStore, retail, PLC, e-commerce, work in various environments. Nepting's payment platform is multi-manufacturer, multi-acquirer, multi-cash register and multi-schemes.

**About HeoH:**

HeoH, a French fintech, reinforces the introduction of payment and digital donation in people's daily lives. Controlled by the ACPR (Banque de France), through its Payment Institution, HeoH has designed an omnichannel platform and several high value-added donation collection and payment solutions, including:

-The GoodTransaction which allows you to make a donation on a payment terminal or an online store, during a purchase, in one click, regardless of the customer's credit card.

-A wide range of donation terminals that allow you to make a donation by credit card or phone. A real communication tool and incentive to donate, they allow you to choose the amount of the donation, to register your e-mail to obtain your tax deduction, to choose your cause.

- an innovative Open Payment solution, designed and deployed with Transdev

- a tipping solution on payment terminal...

and other tailor-made solutions.
